

Shijil Kumar

E-commerce Email & Lifecycle · Klaviyo, deliverability, automation

Kerala, India · remote, 4-hour live overlap with US Eastern mornings · shijil619@gmail.com · +91 94967 94801 · work.shijilkumar.com · linkedin.com/in/shijilkumar · github.com/shijil-kumar

E-commerce operator since 2016 who builds email the way an engineer would: Klaviyo flows for a US DTC brand, a Workers + SES welcome series with duplicate-proof sends, and the SPF/DKIM/DMARC setup that keeps it in the inbox. I use AI tools across the whole campaign workflow and document everything so it can be run as a playbook. Available as a remote contractor through my US LLC (Wyoming) - invoices in USD.

EXPERIENCE

Managing Member · Veltis Labs LLC (US e-commerce holding)

Remote · Feb 2026 - Present

- Building VOZA Wellness, an investor-backed US DTC brand (pre-launch): Shopify store, landing and product templates, Klaviyo flows, transactional and marketing email.

Founder, E-commerce Systems Studio · Digital Shijil

Remote · Oct 2022 - Present

- Built a 5-email welcome series on Cloudflare Workers + D1 + Amazon SES (live since Sep 2026); sends are idempotent, proven by a concurrency test, so no subscriber gets a duplicate.
- Run DNS and hosting for ~15 domains through the Cloudflare API, including SPF/DKIM/DMARC records, with pre-deploy guard hooks that block deploys to production roots.
- Built n8n auto-posting systems for two brands (Instagram, Facebook, Threads); the VOZA system runs a 147-test suite and refuses to publish anything already posted or already queued.
- Ship with AI-assisted engineering (Claude Code with custom skills, guard hooks, CI and tests): every change reviewed and tested before it goes live.
- Operate a network of ~15 WordPress/WooCommerce stores behind Cloudflare: caching layers, WebP image rollout and Turnstile bot protection.
- Recovered 11 WordPress/WooCommerce sites blanked by an Elementor 4.3 / Pro version conflict: diagnosed over SSH, confirmed backups first, swapped plugins site by site with a rollback copy kept for each.
- Set up nightly server-side backups of every site to Google Drive (rclone + cron) with a documented restore path.
- Found and isolated a cloaked block of 13 hidden outbound links injected by a theme plugin, using differential testing across 7 sites.
- Produced 551 conversion-focused website builds for client pitching: editorial landing pages and store front-ends.
- Built 7 SaaS apps (Next.js, Supabase, Stripe) with CI and automated tests (pre-revenue).

Co-Founder · CyberRig Pvt Ltd

Kozhikode, India · Jan 2022 - Present

- Sourced and built GPU mining rigs for a client: ~₹60 lakh (~\$72K) in hardware sales; wrote the build and delivery SOPs.

Founder & E-commerce Operator · Independent e-commerce

India · Aug 2016 - Present

- Built and ran GymBeastMode, a Shopify fitness store: ~\$200K in lifetime sales (2016-2018).
- Run Katta Kompany (kattakompany.com), a live WooCommerce collectibles store: payments, stock holds, order operations.
- Cold-launched a dropshipping store in India: ₹8.5 lakh (~\$10K) in orders in the first 3 weeks.

SKILLS

Email & lifecycle: Klaviyo, Amazon SES, SPF / DKIM / DMARC, Segmentation, Lifecycle flows, Transactional email

E-commerce: Shopify (themes, Liquid), WooCommerce, WordPress, Checkout & payments, Core Web Vitals, GA4, Meta Pixel

Automation: n8n, Make, REST APIs & webhooks, Python, Web scraping (Apify, Firecrawl), LLM APIs (Claude, OpenAI)

DevOps: Cloudflare DNS & API, SSH / Linux, Backups & restore, Hostinger
