

Shijil Kumar

Email Systems & Marketing Ops · ESP architecture, segmentation, lifecycle automation, deliverability

Kerala, India · remote, 4-hour live overlap with US Eastern mornings · shijil619@gmail.com · +91 94967 94801 · work.shijilkumar.com · linkedin.com/in/shijilkumar · github.com/shijil-kumar

I build the backend of email programs: data flowing into the ESP, segments that need no manual pulls, template systems, automated lifecycle flows, QA and deliverability, then document it so the marketing team runs it themselves. My own stack runs Amazon SES and Klaviyo, with SPF/DKIM/DMARC managed through the Cloudflare API. Available as a remote contractor through my US LLC (Wyoming) - invoices in USD.

EXPERIENCE

Managing Member · Veltis Labs LLC (US e-commerce holding)

Remote · Feb 2026 - Present

- Building VOZA Wellness, an investor-backed US DTC brand (pre-launch): Shopify store, landing and product templates, Klaviyo flows, transactional and marketing email.

Founder, E-commerce Systems Studio · Digital Shijil

Remote · Oct 2022 - Present

- Built a 5-email welcome series on Cloudflare Workers + D1 + Amazon SES (live since Sep 2026); sends are idempotent, proven by a concurrency test, so no subscriber gets a duplicate.
- Run DNS and hosting for ~15 domains through the Cloudflare API, including SPF/DKIM/DMARC records, with pre-deploy guard hooks that block deploys to production roots.
- Built n8n auto-posting systems for two brands (Instagram, Facebook, Threads); the VOZA system runs a 147-test suite and refuses to publish anything already posted or already queued.
- Ship with AI-assisted engineering (Claude Code with custom skills, guard hooks, CI and tests): every change reviewed and tested before it goes live.
- Set up nightly server-side backups of every site to Google Drive (rclone + cron) with a documented restore path.
- Recovered 11 WordPress/WooCommerce sites blanked by an Elementor 4.3 / Pro version conflict: diagnosed over SSH, confirmed backups first, swapped plugins site by site with a rollback copy kept for each.
- Produced 551 conversion-focused website builds for client pitching: editorial landing pages and store front-ends.
- Found and isolated a cloaked block of 13 hidden outbound links injected by a theme plugin, using differential testing across 7 sites.
- Operate a network of ~15 WordPress/WooCommerce stores behind Cloudflare: caching layers, WebP image rollout and Turnstile bot protection.
- Built 7 SaaS apps (Next.js, Supabase, Stripe) with CI and automated tests (pre-revenue).

Co-Founder · CyberRig Pvt Ltd

Kozhikode, India · Jan 2022 - 2025

- Sourced and built GPU mining rigs for a client: ~₹60 lakh (~\$72K) in hardware sales; wrote the build and delivery SOPs.

Founder & E-commerce Operator · Independent e-commerce

India · Aug 2016 - Present

- Run Katta Kompany (kattakompany.com), a live WooCommerce collectibles store: payments, stock holds, order operations.
- Built and ran GymBeastMode, a Shopify fitness store: ~\$200K in lifetime sales (2016-2018).
- Cold-launched a dropshipping store in India: ₹8.5 lakh (~\$10K) in orders in the first 3 weeks.

SKILLS

Email & lifecycle: Klaviyo, Amazon SES, SPF / DKIM / DMARC, Segmentation, Lifecycle flows, Transactional email

Automation: n8n, Make, REST APIs & webhooks, Python, Web scraping (Apify, Firecrawl), LLM APIs (Claude, OpenAI)

Engineering: JavaScript / TypeScript, Next.js, Supabase, Cloudflare Workers + D1, Git + CI, Automated testing

DevOps: Cloudflare DNS & API, SSH / Linux, Backups & restore, Hostinger

E-commerce: Shopify (themes, Liquid), WooCommerce, WordPress, Checkout & payments, Core Web Vitals, GA4, Meta Pixel

EDUCATION & MORE

B.E., Computer Science Engineering - Mangalore Institute of Technology and Engineering, 2012-2016 · Google Ads Search Certified · English (professional), Malayalam (native), Hindi (conversational)
